Location Sketch of V-Weapons
Plant No. 456 in Moscow-Khinki

Legend:

- A Plant No. 456
 - 1 Workshop
 - 2 Laboratory
 - 3 Boilerhouse
 - 4 Old workshops
- B Airfield of Moscow-Khinki
- C Concrete bunker 33 feet square (see Annex 5)
- D Launching site (see Annex 5)
- E Gorge
- F PW camp
- G Weather station

8. Raw Material

No observations.

9. Power Supply

No details available. A factory power plant did not exist.

[REDACTED] Comment:

a. This is a good report on the Khimki plant based on first-hand observations extending up to February 1948. At this time the conversion of the plant was not completed so that the observed auxiliary production of tin containers, buckets, bedsteads, etc., seems credible. On the other hand, the observations show that the production of propulsion units for the V-2 had started. The covering of the combustion chamber with wire was mentioned in several former reports. Foreman Pilz is listed in the files of deported German technical personnel and his location in Khimki is confirmed.

b. The reference made to the V-1 shows that the Soviets presumably continue development work on this weapon.

c. The launching site mentioned in para 4 was described in detail as a testing stand for propulsion units of the V-2 in former reports.

d. The attached sketches are copies made from the original drawings supplied by source.

- 5 Annexes:
1. Location sketch of V-weapons Plant No. 456
 2. V-1 missile observed in the Moscow-Khimki V-weapons plant
 3. Hydraulic press observed in Department c of the Moscow-Khimki V-weapons plant
 4. V-2 missile observed in Department D of the Moscow-Khimki V-weapons plant
 5. V-2 launching site near the Moscow-Khimki V-weapons plant

25X1

Hydraulic Press Observed in Department e of the
Moscow-Khimki V-Weapons Plant

Massive steel casting, open at top; in the interior fitted with various tubes, partly arranged in bundles. From the color of the tubes it was inferred that they are of light metal. Different sizes of them were observed

Solid iron lid to be fastened with six nuts

not to scale

Attachment 4

V-2 Missile Observed in Department d of the Moscow Khimki
V-Weapons Plant

Open at the bottom, color grey. Control surfaces were not observed

not to scale
